neuralpclab@gmail.com has invited you to **contribute to** the following shared folder: **HW 3 Data**

Each data file for each subject has been saved with initials of that subject. The data related to each condition also has been saved with the name of that condition (e.g., "SH_sig_blink" is the blink data for Sarah Hosni). The data has been collected from 16 channels. The channel names and locations are also shared with you as "eloc 16.txt" file along with the subjects' data.
