Instructor Marco Alvarez posted a new Note. Your instructor selected to notify everyone in real time of this post, bypassing user email preferences.

programming assignment 2

Hi all,

I am sharing here the specifications for your second programming assignment.   It is due on Nov 17, but I do strongly encourage you to start working as soon as you can.   It is lengthy and will demand a good command of python (matrix manipulation).

I will recommend to use a Linux or Mac computer, otherwise, you might face a nightmare of Windows compatibility issues with Python 3 and all packages.   If you are already doing stuff on Windows, you can give it a try.

All questions should be self-explanatory, but in case you have specific questions you can post them on Piazza or approach any of:

-- Douglas (has already started working on this homework and knows all configuration details)

-- Jared (has extensive experience with Python and IPython notebooks)

-- myself (can try helping out)

ha2.pdf

Please get started as soon as you can.
